Creston recently announced that it has entered into a contract with M3 Engineering & Technology Corporation for the provision of a bankable feasibility study on its El Creston Molybdenum Deposit. The study will be conducted in three phases consisting of scoping, pre-feasibility engineering and feasibility engineering.

El Creston Molybdenum Property

The property is located approximately 135 kilometers northeast of the city of Hermosillo, State of Sonora, Mexico near the village of Opodepe. Access to the property is excellent, via paved highways and 30 km of all weather gravel road. The Minmet molybdenum smelter, a custom facility, is located 40 kilometres from the property.

Infrastructure is well developed within the State of Sonora with road, rail and electrical access throughout most of the state. Sonora is basically a mining state with a labour pool familiar with modern mining practices. Mining equipment is readily available in the area.

Mineral Resource

The Mineral Resources tabulated below for Creston were compiled at a 0.035% Mo cut-off grade. The 0.035% Mo Cut-off grade was calculated using a molybdenum price of US\$6.50/lb, G&A of US\$ 0.75/tonne, process cost of US\$ 3.50/tonne and 87% process recovery.

Creston Primary Resource Estimate @ 0.035% Mo Cut-Off Grade

Classification	Tonnes	Mo %	Cu%	Mo lbs. millions	Cu lbs. millions
Indicated	92,873,000	0.083	0.060	169.9	122.8
Inferred	84,221,000	0.076	0.050	141.1	92.8
